

continue background of artwork into this grey area (may be cutoff)

turn off 'Guides' Layer before submission

Speedlight Duplication Inc.
www.Speedlight-Duplication.com

5"x5"x300dpi CMYK
4.8"x4.8" After Cutting.

This is the template for a two panel insert.

Two of these files are required for a two panel insert, a front and a back image. Name them accordingly.

Please bleed your image beyond the borders of the document to avoid any white space after cutting.

The gray area is the bleed mask. Images here will be printed but may be cut off, but continuing the background of your image into this bleed area is **IMPORTANT** and required.

Keep critical text and artwork at least 1/8 of an inch inside the cut line, inaccuracy during cutting may occur.

DO NOT stretch out previously created artwork to fit this template unless it is 300 DPI or greater.

Any artwork inside of the 'Guides' layer set will **NOT** be printed. **Do NOT** put layers inside of this layer set.
